

Kursrapport

Kursnamn	Samhällsbyggnad och ingenjörsarbete: En introduktion
Kurskod	BG319A
Termin	HT21
Antal registrerade	96
Kursansvarig	Yujing Li

	Kursrapporten är publicerad på kurstillfallets Canvas-sida
	Kursrapporten är publicerad på kursens webbplats

Kursvärdering

Antal svar på obligatorisk kursvärdering	21
--	----

Obligatorisk kursvärdering har skett genom:

<input checked="" type="checkbox"/>	Endast standardmall via SSR (Sunet Survey and Report)
<input type="checkbox"/>	Standardmall utökad med egna frågor via SSR
<input type="checkbox"/>	I egen regi av kursansvarig
Om kursvärdering skett i egen regi av kursansvarig beskrivs tillvägagångssätt här.	

Eventuella ytterligare värderingsmoment som skett under kursen:

<input type="checkbox"/>	Separat enkät
<input type="checkbox"/>	Muntligt i helklass
<input type="checkbox"/>	Muntligt i mindre grupper
<input type="checkbox"/>	Annat sätt
Om ”annat sätt” är ikryssat ovan beskrivs tillvägagångssätt här.	

Kommentarer till kursvärderingar

<p>In total there are 21 out of 96 registered students who have given feedback. Many have given positive feedbacks on the following contents of the course:</p> <ul style="list-style-type: none"> • Interesting course contents • New and useful skills to learn, such as the digital tools and the study techniques • Useful and practical information from the guest lecturers about industry and career • Study visit • Relevant assignments • Group work • Etc. <p>These are the aspects that we should continue working on and keep the good quality of the course.</p> <p>There are also spaces to improve. The structure of the course can be better organized. There are lots of contents from different lectures which can be challenging for the students to adapt to and comprehend. Supplemental course literature to support the course contents can be added. Some assignment can be improved.</p> <p>One of the limitations for the course this year can be caused by the distance learning which has resulted in limited communication. We wish to have this situation improved soon.</p>

Examinationsresultat

X	Examinationsresultat ser ut som förväntat
	Examinationsresultat avviker från förväntat
<p>The result of the examination is within the expectation of the teachers. This is a broad and challenging course with many aspects of building and building sectors. These are not easy to comprehend since they are new for most of the students. A lot of knowledge needs to be learned via course communication which is not fully efficient with the distance learning. We wish that the result will be better when the teaching will be back to campus.</p>	

Kursansvarigs rekommendationer och prioriteringar för kursutveckling

For this year we have increase the number of direct consultations from the teachers to the students for the assignments (IU1 & IU3) which has improved the quality of the submissions and has good feedbacks from both the students and the teachers. We will continue this practice.

The lectures on study technique have good feedback from the students that they have helped the students in learning. This is part of the course content that we should continue.

As the study visits are always inspiring for the students, we wish that we will be able to resume all the study visits that we used to have.

Since it is a broad course with different teachers, we can improve the introduction of the structure at the beginning of the course and provide the follow up of the course during the course to improve students' understanding and connecting all the parts together.

We will also increase the amount of the communication between the teachers and the students to facilitate the understanding.
