<input type="checkbox"/>	Kursrapporten är publicerad på kursens webbplats

Kursvärdering

Antal svar på obligatorisk kursvärdering	25
--	----

Obligatorisk kursvärdering har skett genom:

<input checked="" type="checkbox"/>	Endast standardmall via SSR (Sunet Survey and Report)
<input type="checkbox"/>	Standardmall utökad med egna frågor via SSR
<input type="checkbox"/>	I egen regi av kursansvarig
Om kursvärdering skett i egen regi av kursansvarig beskrivs tillvägagångssätt här.	

Eventuella ytterligare värderingsmoment som skett under kursen

<input checked="" type="checkbox"/>	Separat enkät
<input type="checkbox"/>	Muntligt i helklass
<input type="checkbox"/>	Muntligt i mindre grupper
<input type="checkbox"/>	Annat sätt
Om "annat sätt" är ikryssat ovan beskrivs tillvägagångssätt här.	

Kommentarer till kursvärderingar

Many have given positive feedbacks on the following contents of the course:

- The course provided a broad and good overview of various aspects of building engineering.
- The instructors did a good job, and were helpful and quick to respond to students' questions.
- The course had a good mix of assignments and projects, and the pace was comfortable.

- The lectures were informative and interesting, and the course material was well-structured.
- The use of modeling tools like Revit and SketchUp was particularly engaging and helpful.
- The course helped students develop a sense of responsibility for their own learning, and the examination format allowed students to showcase their knowledge and skills effectively.
- The course provided a good foundation of knowledge about building technology and how companies operate, and was overall enjoyable to take.
- The study visits were inspiring

These are the aspects that we should continue working on and keep the good quality of the course.

There are some aspects that students found a little stressful, e.g.,

- The course is very broad
- Group work does not work all the time
- One needs to wait for the feedback

There are spaces to improve. We can communicate with the students better throughout of the course about the course content, the intended learning goal and the study methods.

We shall support the students' group work better with direct communicateion, consultation and discussions. We will also work on improving the feedbacks to the students.

Examinationsresultat

x	Examinationsresultat ser ut som förväntat
	Examinationsresultat avviker från förväntat
<p>The result of the examination is within the expectation of the teachers. Some students have done it very well. Some students have given the feedback that the exam has a good coverage of the content of the course.</p> <p>This is a broad and challenging course with many aspects of building and building sectors. It is not easy to comprehend especially when the subjects are new. However, some students have expressed that they have understood the knowledge better after the project work, which could also help their learning and perform better in the exam.</p>	

Rekommendationer och prioriteringar för kursutveckling

We will continue with the contents that inspire student in learning, such as the study visits and the project works.

We have observed the improvement of the project works via more communication and consultation. We will continue this practice.

The priority will be given to better communication throughout of the course and more support for the group works.
