

## Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

<b>Course name</b>	Programming in C#
<b>Course code</b>	DA204E
<b>Semester</b>	HT22
<b>Number of registered students</b>	376
<b>Course coordinator</b>	Farid Naisan

	Course report is published on Canvas-site
	Course report is published on course webpage

### Compulsory course evaluation

Number of responses to the compulsory course evaluation	24
---	----

The compulsory course evaluation has been conducted through:

	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with <i>own questions</i> via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

### Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

### Comments on the course evaluations

The number of respondents in relation to the number of students registered in the course is too low. Only about 6% of the students have participated in the evaluation. From the feedback received in the evaluation, it can be concluded
---

that the majority of the respondents have given the course as a whole a very good a positive image. They are happy about the structure of the course, the contents and the help they have received. On the other hand, a number of respondents have had suggestion for improvement that include proofreading, more live-sessions and other diverse ideas. One of the students have criticised the quality of the recorded sessions and also the description of the assignments.

It should be noted that in courses of this size (376 students), it is not an easy task to design and conduct an online course in a subject like programming to meet the expectation of the majority of the students. Despite this, the evaluation results are very satisfying.

### **Examination results**

X	Examination results are as expected
	Examination results are not as expected
131 of 376 students (35%) have completed the course. More students to complete the course are expected to return in the future semesters.	

### **Recommendations and priorities for the course development**

The course is kept up-to-date with the most recent technologies which is one factor that adds to the popularity of the course. No particular or immediate action in connection with the evaluation deems necessary. The contents will be improved on a regular basis.
