

Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Programming in C#
Course code	DA204E
Semester	HT23
Number of registered students	392
Course coordinator	Farid Naisan

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	36
---	----

The compulsory course evaluation has been conducted through:

	Standard template via Reflex
	Extended standard template with <i>own questions</i> via Reflex
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
None-	

Comments on the course evaluations

First of all, the number of respondents is very low (36 of about 400), indicating that the student feedback represents only a small group of students. The results of the evaluation are quite normal and standard, as the course accommodates

hundreds of students from diverse academic backgrounds. However, the evaluation results indicate a positive and above-average ranking across all aspects. It should also be mentioned that the course coordinator receives numerous emails from students praising the content and expressing their appreciation for the contents of the course and the learning opportunities provided

Examination results

x	Examination results are as expected
	Examination results are not as expected
Distance courses typically have lower outcomes; however, for C# courses, the completion rate usually exceeds 40%	

Recommendations and priorities for the course development

The comments and feedback received through the evaluation indicate that no action is required. However, the course is consistently updated to keep up with the latest technologies in .NET
