

Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Programming in C#
Course code	DA204E
Semester	VT24
Number of registered students	486
Course coordinator	Farid Naisan

<input type="checkbox"/>	Course report is published on Canvas-site
<input type="checkbox"/>	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	40
---	----

The compulsory course evaluation has been conducted through:

<input checked="" type="checkbox"/>	Standard template via Reflex
<input type="checkbox"/>	Extended standard template with <i>own questions</i> via Reflex
<input type="checkbox"/>	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

<input type="checkbox"/>	Separate survey
<input type="checkbox"/>	Oral evaluation in class
<input type="checkbox"/>	Oral evaluation in smaller groups
<input type="checkbox"/>	Other evaluation method
None.	

Comments on the course evaluations

Although only 40 of the 486 registered students responded, representing less than 10% of the total, their feedback is still significant. The table surveys indicate an above-average ranking, which is a positive outcome. The verbal feedback presents a mix of opinions, with some students expressing high satisfaction while others complain about the course's difficulty level and workload. Such mixed

reviews are typical for distance courses, with a diverse group of students with varying academic backgrounds and expectations.

Examination results

	Examination results are as expected
x	Examination results are not as expected
<p>The current completion rate stands at around 30%, which is relatively low. However, many students are anticipated to finish the course during the summer holidays and the fall semester. As a result, the final completion rate is expected to exceed 40%.</p>	

Recommendations and priorities for the course development

Based on the evaluation feedback, the course content meets quality standards and does not require immediate modifications. Nevertheless, the course is continuously updated to stay current with the latest advancements in .NET technology.
