	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

The number of respondents corresponds to about 17 % of the total. The participants of the survey show a high degree of satisfaction on the contents of the course, its structure and quizzes . They also have admired the quick grading

and the help they received from the teachers. There are also some suggestions for improvement of the quizzes and assignments. A student has criticized the contents of the reading material to be too abstract to understand.

Examination results

X	Examination results are as expected
	Examination results are not as expected

16 of 41 students (39%) have completed the course. More students to complete the course are expected to return in the future semesters.

Recommendations and priorities for the course development

The course is kept up-to-date with the most recent technologies which is one factor that adds to the popularity of the course. No particular or immediate action in connection with the evaluation deems necessary. The contents will be improved on a regular basis.
