Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Programming in C# and .NET for Non-Beginners
Course code	DA259E
Semester	HT22
Number of registered students	88
Course coordinator	Farid Naisan

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	4

The compulsory course evaluation has been conducted through:

	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with *own questions* via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

The number of respondents (4) compared to the number of registered students (88) are so small that the results of this evaluation can almost be

negligible. However, the feedback provided by those who have responded should be commented and taken into account.

The results are very satisfactory as far as the contents of the modules are concerned but some of the students have expressed their views on the amount of work and difficulty level of the assignments.

Examination results

X	Examination results are as expected
	Examination results are not as expected

The course is given in a 10-week period which feels somewhat intensive. There are student who are working on the assignments even after the end of the course.

Recommendations and priorities for the course development

There is no certain moment that needs any direct action. As the .NET technologies are updated on an yearly basis, the course will be kept up to date for the next session.
