Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Artificial Intelligence
Course code	DA272A
Semester	Ht20
Number of registered students	40
Course coordinator	Radu-Casian Mihailescu

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	4

The compulsory course evaluation has been conducted through:

	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with *own questions* via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

All student respondents to the survey have confirmed that the learning objectives of the course have been fulfilled. There is strong positive feedback regarding the both the method of delivery as well as the contents of the course.

The survey shows that the students consider that the assignments played an important role in grounding the concepts introduced during the lectures. Furthermore, the survey shows that students appreciate the new perspectives and ways of thinking gained during this course.

Examination results

	Examination results are as expected
	Examination results are not as expected

Recommendations and priorities for the course development

Teaching assistants in the course will be instructed to provide more relevant feedback and support on the assignment reports. Since this year we have changed the TAs in the course, some level of getting on track with the course material and approach of the course was to be expected.
