

Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Artificial intelligence
Course code	DA272A
Semester	Ht22
Number of registered students	40
Course coordinator	Johan Holmgren

<input type="checkbox"/>	Course report is published on Canvas-site
<input type="checkbox"/>	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	6
---	---

The compulsory course evaluation has been conducted through:

<input checked="" type="checkbox"/>	Standard template via SSR (Sunet Survey and Report)
<input type="checkbox"/>	Extended standard template with <i>own questions</i> via SSR
<input type="checkbox"/>	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

<input type="checkbox"/>	Separate survey
<input type="checkbox"/>	Oral evaluation in class
<input type="checkbox"/>	Oral evaluation in smaller groups
<input type="checkbox"/>	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

Since only six students chose to participate in the course evaluation, it is difficult to assess whether the views of these students represent view of the whole student group. The students who completed the evaluation seemed to be in general satisfied with the course; still, some valuable suggestions for improvement were provided. It was pointed out that some of the laboratory assignments, in particular the one on machine learning, were quite complex and requires additional support.

Examination results

	Examination results are as expected
X	Examination results are not as expected
Written examination results are as expected, whereas the results for the laboratory assignments are a bit lower than expected.	

Recommendations and priorities for the course development

There is a need to go through the laboratory assignments, and perhaps replace the machine learning assignment. It would be also good to consider providing extra support for the laboratory assignments to help the students with practical part of the course.
