Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Internet of Things and People
Course code	DA274A
Semester	HT23
Number of registered students	15
Course coordinator	Fisseha Mekuria

X	Course report is published on Canvas-site
X	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	

The compulsory course evaluation has been conducted through:

	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with *own questions* via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

X	Separate survey
X	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

The Course Lab needs careful organization and we need perhaps to increase the Lab assistantships to be composed of 2 people allocated, so that the student supervision and project assignmnents are addressed for the supervision of students

Examination results

X	Examination results are as expected
	Examination results are not as expected

It is to be expected that those students who got G & VG were the ones who took the course seriously and gave time to study the course material, take part on the Labs, completed and submitted their assignments and projects.

Recommendations and priorities for the course development

The course material and slides have been updated to cater for new tech standards and updates on IoT security aspects and use cases. The Labs need good organization and two people allocated to improve students supervision and assignment of projects during the Labs.

Another recommendation is that the current Take-Home exam format should be replaced by digital onsite written exams.
