Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Algorithmic methods for search and storage
Course code	DA295E
Semester	VT22
Number of registered students	10
Course coordinator	Jesper Larsson

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	1

The compulsory course evaluation has been conducted through:

×	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with *own questions* via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

There were very few students on the course, and only one has answered the evaluation, and the answers do not significantly alter the impression that teaching the course has provided.

Examination results

	Examination results are as expected
	Examination results are not as expected

Recommendations and priorities for the course development

This course has only been given this first time in its current form, and it has been a substantial learning experience for me as a teacher as well. The content and requirements are going to remain the same, but many improvements will be made in teaching material and assignments to make it more accessible and easier to for the students to fulfil the requirements.
