Comments on the course evaluations

The course evaluation was submitted by only 1 student out of 14. I cannot read anything from this evaluation.

At the end of the course, I had an oral evaluation session in the class. The students appeared to be very satisfied with the content and the assignments. Most of them appreciated working in groups and the oral presentations. It was a suggestion to make the discussion seminars mandatory, which we will consider the next time the course is given.

Examination results

X	Examination results are as expected
	Examination results are not as expected
10 out of 14 registered students passed the course, which I consider very good.
