### Compulsory course evaluation

Number of responses to the compulsory course evaluation	3
---------------------------------------------------------	---

The compulsory course evaluation has been conducted through:

<input checked="" type="checkbox"/>	Standard template via Reflex
<input type="checkbox"/>	Extended standard template with <i>own questions</i> via Reflex
<input type="checkbox"/>	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

### Additional evaluations that were conducted during the course

<input type="checkbox"/>	Separate survey
<input type="checkbox"/>	Oral evaluation in class
<input checked="" type="checkbox"/>	Oral evaluation in smaller groups
<input type="checkbox"/>	Other evaluation method
If other evaluation method was conducted, describe how:	

### Comments on the course evaluations

Only three students have answered the survey. But I think those three students where quite satisfied with the course. Unfortunately many students do not come to the labs. In the beginning where there are mandatory exercises there is quite a
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

lot of students, but when they are supposed to get help with their assignments students drop off. One reason might be that the students prefer to use their own laptops, and this year we had a lot of gradle problems due to that they sat on different kinds of compute. The course is also given in parallel with the thesis course and it is understandable that the students prioritise the theses. This put together has led to that we have decided to give the course as an online course next year. The material is in most parts already adjusted to the conditions during the pandemic so this will not be a revolutionary step to take.

### Examination results

x	Examination results are as expected
	Examination results are not as expected
<p>The results are about the same as last year, but it would be nice if more students completed the course in time. I have to think about how to arrange the course in a way that can make it easier for the students to combine this course with the thesis course.</p>	

### Recommendations and priorities for the course development
