Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Artificial intelligence for data science
Course code	DA631E
Semester	HT22
Number of registered students	29
Course coordinator	Magnus Johnsson

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	11

The compulsory course evaluation has been conducted through:

x	Standard template via SSR (Sunet Survey and Report)
	Extended standard template with *own questions* via SSR
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

The course is perceived as demanding but overall good and in particular the project seems to have been very popular.

Some students have perceived some lectures as being too crammed with information but at the same time that not everything they were expected to read was brought up during the lectures. The teachers will try to make those lectures less dense and also stress more that the lectures bring up the core material and the most important things, but that the students are also expected to not only attend the lectures, but in addition study all the recommended material on their own.

Examination results

x	Examination results are as expected
	Examination results are not as expected
