2025Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	AI and Data Management for IoT
Course code	Da642E
Semester	VT2025
Number of registered students	28
Course coordinator	Reza Khoshkangini

	Course report is published on Canvas-site
	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	6

The compulsory course evaluation has been conducted through:

x	Standard template via Reflex
	Extended standard template with *own questions* via Reflex
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
x	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how: I asked students about the course, project, etc, and its different modules. The overall reflection was positive however there are some aspects which we need to work on to improve.	

Comments on the course evaluations

The overall reflection was positive; however, as it was highlighted, there are some points that we need to improve both in lectures and also in the teachers. There is some feedback regarding the course project responsibility, which I think is not a big problem, and it will be fixed in the next year. We have had sessions regarding the project 3 times before the project presentation, and there, students can come and ask their questions, etc. However, I had a meeting with the course project responsible, and the problem is fixed.

Examination results

x	Examination results are as expected
	Examination results are not as expected

Recommendations and priorities for the course development

The recommendation is that we get more resources for the teacher's team. More senior teachers are needed in this course to deliver the lectures. Since we did not have enough resources, we used phd students to deliver the lectures, so next year we will use more experienced teachers to deliver the lectures. We will try to synchronize more the labs and lectures in the next year.
