Studentperspektiv (Fylls i av kursansvarig lärare)

Sammanfattning av studenternas kursvärderingar: (De fem obligatoriska frågorna ska belysas. Sammanställning från enkätverktyg kan bifogas om så önskas.)

Lärarperspektiv **(Fylls i av kursansvarig lärare)**

Sammanfattning av lärarnas synpunkter/Resultat: While the lectures were generally well attended, the seminars were less so, for the theoretical part of the course. Had the course been given again, seminar attendance would have been more rigorously monitored. We could also have worked to integrate the theoretical and applied parts of the course.

Analys och åtgärdsplan **(Fylls i av kursansvarig lärare)**

Analys: The students were generally happy with the lectures and seminars, and were through verbal communication, appreciative of the combination of theoretical and applied approaches to the topic. The GIS module gave the hands-on experience in an area that, in a good way, stood out in the syllabus for the course and program. There were some concerns that the online format was less than optimal; however, this format was chosen because of the advantages of sharing software without having to be physically present. Some students mentioned that the seminar grades were not fairly given, since those who participated a lot in some cases ended up with the same grades as those who did not participate.

Åtgärdsplan: The course will not be given in the future, due to a previous revision of the program as a whole.
