

Course report Faculty of Technology and Society

This course report is based on student feedback and submitted course evaluations, exam results and the teacher's idea for further development. The course report is published on the course website and Canvas-site.

Course name	Computational Physics: Introductory Course
Course code	FY130E
Semester	VT26
Number of registered students	68
Course coordinator	Jörgen Ekman

	Course report is published on Canvas-site
X	Course report is published on course webpage

Compulsory course evaluation

Number of responses to the compulsory course evaluation	6
---	---

The compulsory course evaluation has been conducted through:

X	Standard template via Reflex
	Extended standard template with <i>own questions</i> via Reflex
	Own evaluation method by the course coordinator
If own evaluation method was conducted, describe how:	

Additional evaluations that were conducted during the course

	Separate survey
	Oral evaluation in class
	Oral evaluation in smaller groups
	Other evaluation method
If other evaluation method was conducted, describe how:	

Comments on the course evaluations

There are relatively few respondents to the course evaluation, so it is difficult to draw any conclusions. However, based on the evaluation it seems that the students are very pleased with the course and that conditions are met to allow the students to fulfill the learning outcomes

Examination results

x	Examination results are as expected
	Examination results are not as expected
Relatively few students (13) finished the course with passed grade, but this in line with previous years and not surprising for a 100 % online course.	

Recommendations and priorities for the course development

No changes are planned for the next year at this point.
