Template for course reports at the Faculty of Education and Society at Malmö University

Revised 2023-06-13

The course report is an important instrument for the development of courses and programmes, as well as for guaranteeing student influence in this work. The *Decision on the model for systematic education-related quality work at the Faculty of Education and Society* (UTB 3.1-2017/410) indicates that course reports constitute the basis for the programme boards' efforts to systematically monitor the quality of the programme as a whole.

The *Course evaluation process at the Faculty of Education and Society* (UTB 3..2.2-2018/479) specifies what applies for the course report, including feedback to students.

The course report should include background information/key figures and a summary of the students' course evaluations, as well as analysis and an action plan together with any suggestions for revision of the course syllabus.

The course report is to be published in connection with other information about the course.
