Utvärderingsformer

There was a short temperature check half way in to the course. During the last week of the course the students were writing a personal evaluation with + - and things to change. This was followed by a discussion. After the course the students took part of an online evaluation. 14 students attended.

Sammanfattning av studenternas kursvärderingar

Good and clear structure of the course/weeks. The students really like the teambuilding using dance as a tool was very good. The students find all lecturers engaged and skilled. Good with group work/seminar,

the variation of subjects/themes, poster presentation as assessment, student seminars, practical examples, weekly portfolio tasks, face to face lectures.

Changes in schedule in some weeks was annoying. More time for the poster.

Sammanfattning av lärarlagets utvärdering

The course as a whole full filled the learning outcomes very well. Over all the students expressed that they were challenged in a good way and also took good responsibility in their work in seminar groups and tasks. The lecturers are in most cases pleased with their weekly themes

Analys

The weekly structure should be kept and is seen as very positive from both students and lecturers. The number of themes is now reduced according to last year`s evaluation. The number of articles has been decreased to better fit the work load for the students. So not so many comments on the work load. During the course start and the introduction week all students were guided in how the platform Canvas work and also helped in creating the e-portfolio. This was due to recommendations from last year´s evaluation. The students are very pleased with the response from the individual lecturers in most cases. Student appreciated to work with the poster and the presentation.

Åtgärdsplan

To make the guidelines on assessment in the course guide more understandable there is a need for a scheduled and specific part of the introduction to do this. We might need to give the students even more time for making the poster. The following need to improve: The teacher team need to individually have a better understanding of the course as a whole.

Förslag till revidering av kursplan

No need for change.
