Utvärderingsformer

As the course needed to be conducted on-line due to the pandemic it was decided to hold weekly meetings. On the last day of the course the students had the chance to fill in an online survey as well as an oral for discussion.

Sammanfattning av studenternas kursvärderingar

On the positive side most of the students highlighted the clear structure of the course, the teambuilding in the start, despite that it was on-line, engaged and skilled lecturers, group work, the variation of subjects/themes, poster presentation as assessment, student seminars, practical examples, weekly portfolio tasks. The workload was reasonable. To be able to attend the EASM-conference was very good.

On the negative side the students highlighted that it was problematic to get feedback when working on the portfolio. During the presentations of the posters, the students could not see them all. The links to the schedule should have been posted at one place on Canvas.

Sammanfattning av lärarlagets utvärdering

The course as a whole full filled the learning outcomes very well. The students where challenged and took good responsibility in their work and tasks. The lecturers are in most cases pleased with their weekly themes. The lecturer team where all very well prepared and followed the same structure. Good preparation meetings before the course start helped.

Analys

The weekly structure should be kept and is seen as very positive from both students and lecturers. The number of themes is good and links well. The workload reflects well the amount of articles and tasks the students faced every week. The students are very pleased with the response from the individual lecturers. The change on giving the students time to prepare the posters went well. The grading table need to be highlighted even more clearly.

Åtgärdsplan

Make the guidelines on assessment in the course guide even more understandable and processed among the students.

Förslag till revidering av kursplan

No changes needed.
