Utvärderingsformer

As the course needed to be conducted on-line due to the pandemic it was decided to hold weekly meetings. On the last day of the course the students had the chance to fill in an online survey.

Sammanfattning av studenternas kursvärderingar

On the positive side most of the students highlighted the clear structure of the course. The students see positive, engaged and skilled lecturers. Positive parts are group work, the variation of subjects/themes, poster presentation as assessment, student seminars, practical examples, weekly portfolio tasks. The workload was reasonable. The students would like to see more feedback from lecturers connected to the portfolio. Sometimes a bit confused which course the lecture belong to.

Sammanfattning av lärarlagets utvärdering

The course as a whole full filled the learning outcomes very well. The students where challenged and took good responsibility in their work and tasks. The lecturers are in most cases pleased with their weekly themes. The lecturer team where all very well prepared and followed the same structure. Good preparation meetings before the course start helped.

Analys

The weekly structure should be kept and is seen as very positive from both students and lecturers. The number of themes is good and the amount of literature. The workload reflects well the amount of articles and tasks the students faced every week. The students are not fully positive with the response from the

individual lecturers. The change on giving the students time to prepare the posters went well. The grading table need to be highlighted even more clearly.

Åtgärdsplan

Work on how to feedback in the teacher team more structured.

Förslag till revidering av kursplan

No changes needed.
