**Utvärderingsformer**

The evaluation was in two parts. 1. Anonymus written swot-analyze. 2. Oral discussion .

**Sammanfattning av studenternas kursvärderingar**

Very good with various themes. The students see positive, engaged and skilled lecturers. Positive parts are group work, the variation of subjects/themes, poster presentation as assessment, student seminars, practical examples, weekly portfolio tasks. The workload was reasonable. The students would like to see more feedback from lecturers connected to the portfolio. Well structured course.

**Sammanfattning av lärlagets utvärdering**

The course as a whole full filled the learning outcomes very well. The students where challenged and took good responsibility in their work and tasks. The lecturer team where all very well prepared and followed the same structure. Good preparation meetings before the course start helped.

**Analys**

The weekly structure should be kept and is seen as very positive from both students and lecturers. The number of themes is good and the amount of litterature. The workload reflects well the amount of articles and tasks the students faced every week. The students are not always fully positive with the response from individual lecturers. The grading table need to be highlighted even more clearly.

**Åtgärdsplan**

Remind each lecturer to feedback after their weekly theme.
