Course coordinator: Torbjörn Andersson

Number of registered students: 12, and 11 who started the course

Number of students who responded to the summative course evaluation: 2

Implementation	Mark with an X
The previous course report is communicated in connection with the start of the course	X
Early dialogue on expectations for the course	X
Formative course evaluation	
Summative course evaluation	X
Feedback to students	

Forms of evaluation

A survey of 12 questions. One additional open question about possible improvements in the course. The questions were based on the learning outcomes, the work forms, on how scientific the course was and on the amount of hours spent on the course by the students.

Summary of the students' course evaluations

The two responding students were to a rather large extent pleased with the course.

Summary of the evaluations of the teaching team

This is a course based on writing a 30 hp thesis, so the supervision and examination are the basis of the whole course. The teaching team was pleased that we managed to reduce the number of pages in the thesis which meant that the examiners had more time to read/comment/grade the texts with quality.

Analysis

The course has tight resources and we think the work form is good now, with three seminars, and the rest of the time devoted to supervision and the final opposition seminar.

Action plan

No immediate actions planned.

Proposed revisions to the course syllabus

Not at the moment.

.
