

The work with course evaluations and course reports constitutes a part of the faculty's quality assurance work in education at first-cycle and second-cycle education. The course report is a comprehensive documentation of the course evaluation and is an important instrument for the development of courses and programmes as well as for guaranteeing the students' influence on these. The course report takes into account the students' course evaluations, the teachers' views on the course's implementation and the results based on an assessment of the students' achieved learning outcomes in relation to the intended learning outcomes of the course. Key figures, an analysis and a development plan for the course are also included in the course report.

It is of the utmost importance that students are given the opportunity to participate throughout the course evaluation process and that they make use of the opportunity to give constructive criticism. In this way, the results can serve as a relevant and specific foundation for improvement.

The structure for course evaluation is described in the "Course evaluation process for first- cycle and second-cycle education at Malmö University" (in Swedish *Kursvärderingsprocessen för utbildning på grundnivå och avancerad nivå vid Malmö universitet*), Ref. no. LED 1.3-2018/123) and in the "Routines for course evaluations and course reports at the Faculty of Health and Society" (in Swedish *Rutiner för kursvärderingar och kursrapporter vid Fakulteten för hälsa och samhälle*), Ref. no. LED 1.3-2016/187.

The course report compiled after each completed (full) course forms the basis for feedback to students and is followed up at quality dialogues at faculty- and university-wide level.

<p>Results: Comments on the course implementation and the results based on an assessment of the students' achieved learning outcomes in relation to the course intended learning outcomes are summarised here (incl. information regarding the result of the examination). Both success factors and problems are identified</p>
<p>Answers:</p> <p>-To what extent would you say that you have achieved the course's intended learning outcomes? (Mean 5,8)</p> <p>-To what extent would you say that the forms of work/learning activities of the course have supported you in your learning, so as to be able to achieve the intended learning outcomes? (4,9)</p> <p>-To what extent would you say that the forms of examination of the course have given you the opportunity to show how well you have achieved the intended learning outcomes? (Mean 5,0)</p> <p>-To what extent would you say that the course as a whole has met with your expectations? (Mean 5,3)</p>

- To what extent has the course given you the opportunity to take responsibility for your own learning?(Mean 5,7)
- To which extent have the work materials in the cours made it easier for you to achieve the learning outcomes (Mean 3,9)
- To which extent was the course research based? (Mean 5,6)
- To which extent has the workload during the course been reasonable to reach the learning outcomes? (Mean 5,3)
- How many hours per week did you study at this course (Mean 4,1)
- To which extent has there been an opportunity for student influence? (Mean 4,9)
- How do you rate the international aspects of this course? (Mean 3,0)

Analysis: Analysis based on a summary of the students' individual course evaluations – both formative (if any), and summative evaluations. Produced in collaboration with the teachers involved in the course, alternatively by taking their views into account.

In general the students were positive to the course and the content. There were a few comments that should be considered in the course in spring 2023:

- One student argued that the Feedback should be changed. Maybe questions about supervisions and examination should be added.
- One student argued that the graduation ceremony and the attract was in the last minute. This was not part of the course.
- Two students argued that one examiner had been unprepared and critical. This is something that we will discuss in the coming meetings with supervisors and examiners.
- One student argued that the seminars/examinations were good.

Course development and action plan: Course coordinator's suggestions for changes, comments and actions. Describe the relevant and possible changes to be implemented in the short and long term and when they are planned to be put into action. Specify who is responsible for the implementation: the course coordinator or another teacher. If a problem was identified, explain why nonetheless no consequent changes are warranted. Follow-up of measures proposed based on previous course report(s) should also be presented here.

- Add questions in the course evaluation regarding supervision and examination
- Discuss with supervisors and examiners about how the examination should be carried out
