Student's perspective (To be completed by the course coordinator)

Summary of the students' oral and written feedback:

Only four respondents, so the points here are not representative

- Suggest having supervisors meet to discuss projects. In part so there is calibration and exam time and in part to provide new critical feedback.
- Suggest fixed time slots for supervision rather than ad-hoc booking
- Suggest easier access to ioio facilities

Teacher's perspective (To be completed by the course coordinator)

Summary of the teacher's views:

The course ran smoothly and no particular issues were brought to my attention by advisors or students. It's unclear why ioio wasn't available, this is signposted for all students.

Action plan (To be completed by the course coordinator)

- Advisors can be recommended to meet and discuss together (this has been difficult to orchestrate in the past)
- Advisors can be recommended to see whether fixed or ad-hoc supervision is possible
