Student commented that lab time could be used more effectively. Students requested more practice exercises. Otherwise my impression is that the course is received positively overall. Lectures were well attended and students were generally active.

Kursansvarigs rekommendationer och prioriteringar för kursutveckling

Lab exercises should be slightly reworked so that less time is spent on repetitive tasks and more is spent on specimen analysis. Teacher should upload material, readings, etc. to the course web page earlier, and should provide more practice material.
