

## COURSE REPORT – Summary of course evaluation

The course report is a summary of the course evaluation. The course evaluation takes into account the students' course evaluations, the study administration's views, the teachers' views, and the course outcome - ie the students' actual results, course completion, and conditions for course implementation such as teaching and supervision time, premises and support functions. The course report also contains an analysis and development/action plan for the course.

The course report forms the basis for feedback to students and follow-up in quality dialogues both in the education-centered and in the university-wide quality work.

### Student's perspective (To be completed by the course coordinator)

<p><b>Summary of the students' course evaluations:</b> (The five university-wide questions should be included. Compilation from digital questionnaires can be appended.) Learning outcomes (LOs) reached (3,8); Work/Learning activities support your learning (4,0); Forms of examination (4,0); The course as a whole has met my expectations (3,8); Has the course given you possibilities to take responsibility for your own learning (5,0) Comments from the students:</p> <p><i>I am still confused about the whole aspect of Storytelling in the module called "Power and Resistance" - maybe that should be part of the title. I am still confused about the whole aspect of Storytelling in the module called "Power and Resistance" - maybe that should be part of the title. Especially the seminars and the guided discussions we had in the module were of big value, as well as the group work of assigned members! The literature has been very interesting. Especially Evans and Wright/Nyberg. I appreciated the clear structure and communication about the course. The course provided all the important aspects regarding power and resistance especially through group assignment and workshops during the class, making the concept more understandable.</i></p>

### **Teacher's perspective (To be completed by the course coordinator)**

**Summary of the teacher's views/Results:** (The comments on the course's implementation and the results based on an assessment of the students' actual learning outcomes in relation to the intended learning outcomes, are summarised here. Both success factors and problems are identified). I think it is a good idea to highlight that this course is very much about storytelling.

### **Analysis and action plan (To be completed by the course coordinator)**

**Analysis:** (The course coordinator is responsible for ensuring that the analysis is based on a summary of the students' individual course evaluations, views from relevant teachers and course administrators, knowledge development in the field of research and that this analysis is done in collaboration with the teaching team.)

**Action plan:** (The changes planned to be made in the short and long term are stated here, as well as the timetable for when the actions are planned be carried out and who is responsible for the implementation. If identified problems are left without action, this should be justified. The follow-up of proposed measures according to the previous course report(s) is presented here.) More lectures on digitalization and even one or two lecture on ongoing practical research on sustainability will be added to the course.

### **Publishing and archiving (To be handled by the course administrator)**

The course report is published and archived according to the university's instructions.

The students are informed about the publication.

The course report is shared with the programme coordinator (if applicable) and saved according to any additional requests on behalf of the department.
