COURSE REPORT – Summary of course evaluation

The course report is a summary of the course evaluation. The course evaluation takes into account the students' course evaluations, the study administration's views, the teachers' views, and the course outcome, ie the students' actual results, course completion, and conditions for course implementation such as teaching and supervision time, premises and support functions. The course report also contains an analysis and development/action plan for the course.

The course report forms the basis for feedback to students and follow-up in quality dialogues both in the education-centered and in the university-wide quality work.

Summative course evaluation: (Describe the form of course evaluation and when it was completed)	**Number of students who participated in the course evaluation:**
Feedback to students: Thanks for nice comments. There is one criticism about the student presentations at the end that seem to be unnecessary. But student presentations are part of the examination and are a way to know what your colleagues have been doing research on. One student wants more 'supervision' but as course coordinator I have no say over how much time project leaders spend with their research intern.
